HOW TO USE THIS CALENDAR

The following provides an overview of the structure of this Calendar to guide users.

General Information

This section provides the contact information for the Faculty and University.

Degrees and Diplomas conferred in the Faculty

This section provides information on each of the qualifications conferred in the Faculty.

Explanation of the National Qualifications Framework (NQF)

This is a brief section on the NQF levels and qualification types.

Faculty Board and Faculty Office Staff

This section lists staff members who constitute the Faculty Board and Faculty Office staff members.

Lecturing and Technical Staff

A comprehensive Faculty staff listing per Department, Centre, Institute, School or Unit is provided.

Rules for Programmes

This section provides information on the rules for each academic programme at undergraduate and postgraduate level offered by the faculty. These rules should be read in conjunction with the academic rules (Section 3) of the General Calendar (Part 1). Students should acquaint themselves with the rules in both Calendars and annually check for rule and curriculum changes.

Module Descriptors

This section provides information on all the modules offered by the faculty at undergraduate and postgraduate level. Module descriptors contain information which relate to the main outcomes and content for each module, including the credit value and NQF level of the module. It is set in alphanumeric order per undergraduate and postgraduate offering.

Explanation of Symbols and Remarks on Academic Transcript

This section provides an explanation of the symbols used and the remarks on the academic transcript.

Unless Senate decides otherwise, a student shall be required to meet the following criteria to be enrolled for the **Bachelor of Education Degree in Senior Phase and Further Education and Training Teaching (Mathematics (SP), Mathematical Literacy (FET) and Natural Science (SP)**:

E.107.1 Minimum admission requirements for applicants who matriculated from 2008

- (a) The National Senior Certificate for Bachelor's Degree study with a score of no fewer than 33 points calculated according to the University's approved points system, as well as the following minimum specific subject requirements area:

- Level 4 (50-59%) in English (Home or First additional Language), and
- Level 3 (40-49%) in another Language (Home or First Additional Language), and
- Level 3 (40-49%) in Mathematics or Mathematical Literacy

OR

- (b) A qualification or level of competence which the Senate of the University has deemed to be equivalent to the requirements stipulated in (a) above.
- (c) In addition to the above, applicants are required to meet the minimum specific subject requirements for the learning-area specialisation combination: **Mathematics (SP), Mathematical Literacy (SP & FET) and Natural Science (SP)**
- Level 4 (50-59%) in English (Home or First Additional Language), and
 - Level 3 (40-49%) in another Language (Home or First Additional Language), and
 - Level 4 (50-59%) in Mathematics, or
 - Level 6 (70-79%) in Mathematical Literacy, and
 - Level 4 (50-59%) in Life Sciences, or
 - Level 4 (50-59%) in Physical Sciences

E.107.2 Admission requirements for applicants who matriculated before 2008

- (a) A Matriculation Certificate or Exemption Certificate thereof or conditional exemption from the Matriculation Board.

Learning Area Specialisations

To qualify for admission to all learning areas, applicants should obtain at least a Level 4 (50% - 59%) or a D (HG) or C (SG) in Grade 12 in the subject or area of specialisation.

OR

- (b) A qualification or level of competence which the Senate of the University has deemed to be equivalent to the requirements stipulated in (a) above.

If the Senior Certificate was obtained before 1977, the applicant must have obtained in the Senior Certificate Examination:

- i) at least 40% in one of the official languages in the Higher Grade;
- ii) at least 33% in the remaining official language on the Lower Grade;
- iii) at least 40% in two additional subjects.

E.107.3 Admission requirements for applicants who obtained a National Certificate (Vocational) (NCV):

- (a) Subject to institutional admission requirements, the minimum admission requirement to a Bachelor's degree programme is a National Certificate (Vocational) Level 4 issued by Council for General and Further Education and Training. The minimum legislative requirements for admission to a Bachelor's degree include the achievement of:

- Three (3) fundamental subjects between 60 - 69% (including English as the language of learning and teaching at University of Western Cape)
- Three (3) vocational subjects from the designated list between 70 - 79%.

- (b) The institutional requirements are:

- (i) An applicant who holds an NCV may be invited to write a test, provided that he/she has met the following compulsory institutional requirements, as well as the Faculty and degree-specific requirements.
- (ii) An applicant must have:
 - Taken English as either Language of Learning and Teaching or as the First Additional Language.
 - Taken Mathematics as a Fundamental Component.
 - Achieved 70 - 79% for all seven subjects - in fundamental and vocational categories.

E.108 SELECTION

Final selection shall be based on an applicant meeting the criteria as determined by the Faculty.

E.109 DURATION

Unless Senate decides otherwise the duration of the programme shall extend over four years full-time.

E.144 ASSESSMENT

E.144.1 Assessment is governed by Rule A.5 as stipulated in the University Calendar: General Information Part 1.

E.144.2 The following assessment rules shall also apply to this programme:

E.144.2.1 A supplementary examination may be written in a maximum of three of the compulsory subjects.

E.144.2.2 If a final mark of below 50% but not less than 45% is obtained in Teaching Practice an additional period of supervised practice teaching must be arranged in consultation with the Faculty.

E.145 ADVANCE REGISTRATION

The renewal of registration will be governed by the Rule A.3.2.3, as stipulated in the University Calendar: General Information Part 1.

E.146 PROGRESSION RULES

Unless Senate decides otherwise, a student shall complete the programme in one year. A student who has passed at least 90 credits may proceed with his/her studies to complete the programme the following year.

E.147 RENEWAL OF REGISTRATION

Renewal of registration shall be governed by Rule A.4, as stipulated in the University Calendar: General Information Part 1 or as provided for in the Faculty rules.

E.148 SPECIAL REQUIREMENTS FOR THE PROGRAMME

E.148.1 80% attendance is compulsory for all practicals in the Faculty.

E.148.2 Courses in secondary school teaching method cannot be taken in a subject in which only practical or special courses (e.g. English 105) have been taken, i.e. a course which will not admit a student to Level 2 in the subject concerned. These courses are introductory or bridging type courses and do not have the rigour of a content course as stipulated that would lead to competent and confident teaching.

E.148.3 Prospective teachers seeking employment within a particular educational authority need to acquaint themselves with the teacher selection procedures, if any, required by such an authority.

E.148.4 German Special 305 and French 305 are recognised for method purposes as school subjects on Level 2.

E.148.5 To offer teaching methods in Mathematics/Mathematical literacy, the degree should include Mathematics II or Mathematics I and Statistics/ Mathematical Statistics/ Applied Mathematics/ Financial Mathematics II at least.

E.148.6 To offer teaching methods in Physical Sciences for the FET phase the syllabus requires competence in both Physics and Chemistry, for example, Physics II and Chemistry I would be an acceptable combination.

E.148.7 To offer teaching methods in Life Sciences for the FET phase a combination of any two of Biological Sciences, Biochemistry, Microbiology, Physiology, Botany and Zoology, one at least at level 2, is required (provided a Level 1 in Biology or Botany and Zoology is also included).

E.148.8 To offer teaching methods in the learning area Natural Sciences for the Senior Phase require competence in aspects of Physical Geography/ Environmental Sciences, Physics, Chemistry and Biological Sciences. A combination of at least two of these at Level 1 would be regarded as sufficient.

E.148.9 To offer teaching methods in Life Orientation for the FET phase it is recommended that the prospective student should have completed a combination of at least two of the fields in the undergraduate degree, for example Human Movement Sciences and Psychology.

E.148.10 To offer teaching methods in English for the FET phase the degree should include English (language and Literature) at second year level at least. The following are also acceptable provided English I is included in the degree: Applied English language Studies/ African Literature/ linguistics/ literary theory/ Communication and media Studies.

E.148.11 In a case where an undergraduate qualification does not fully meet the requirements to offer a specific teaching method an institution may require of a student to concurrently study a module or course to strengthen their disciplinary knowledge while completing the PGCert in order to ensure thorough teaching competence in that area. This is not applicable/cannot be applied to instances where the student does not fully meet the admission requirements for the PGCert.

E.148.12 A student should have selected their subjects in such a way that they would be able to take courses in the method of teaching in two school subjects.

E.148.13 A student should consult with the Faculty of Education to determine in which subject method courses are offered.

E.148.14 Optional subjects: (one per semester)

Module Name	Module Code	Cred
Teaching and Learning Resource Development 428	HDE428	15
Computers in Education 427	HDE427	5
Physical and Health Education 328 (Compulsory for all Life Orientation students)	SRE328	10

E.148.15.1 The Faculty reserves the right not to offer any of the optional subjects during a particular year. These are not compulsory, and can be done as extra-mural additional offerings.

E.148.15.2 A student is strongly advised to make use of the facilities for sport and cultural activities in view of the demand for teachers with experience in these aspects of the school programme. Candidates will receive certificates of attendance.

Main Outcomes	On completion of this module, students should be able to: <ul style="list-style-type: none"> Profound understanding, manipulative competence and the command of cognitive and conceptual tools to deal with arithmetic and geometry.

Main Content	<ul style="list-style-type: none"> • Properties of $(Q, +)$, (Q, \times), $(Q, +, \times)$. The concept of a field and the field of rational numbers. Rational numbers and fractions. • Properties of R and the field of real numbers. Irrational numbers. Intervals of real numbers, absolute value, number and decimal representation of real numbers. Real numbers as infinite decimals. Fundamental operations including root extraction and exponentiation. Scientific notation of real numbers • Ratio. Elements of financial mathematics I. • Quadrilaterals and polygons. Definitions, properties, classifications, theorems. • Elementary statistical concepts: Measures of central tendency. • Functions and relations I. Definitions, domain, range, representational forms. Polynomial functions: algebra of polynomial functions. Solution of linear and quadratic equations: equality, equivalence, difference. • Mathematical problem-solving and modelling <p>Graduate attributes covered</p> <ul style="list-style-type: none"> • A critical attitude towards knowledge

Programmes in which the module will be offered	BEd (Hon) (4115 FT) (4116 PT) PGDE (4652)
Year level	8
Main Outcomes	<p>On completion of this module, students should be able to:</p> <ul style="list-style-type: none"> • Describe adolescent or young adult literature. • Analyse the role of adolescent literature in the development of a world view and the development of a life-long reader. • Summarise elements of (and reading materials representing) popular culture and how those elements affect teen reading interests. • Evaluate books across various text types and themes. • Identify books used in the classroom and library and assess goals for creating a climate of understanding and appreciation for diverse cultures and heritages. • Develop activities for motivating young adults to read and discuss books critically, for example: book clubs, literary circles. • Analyse literary elements -- for example: content, plot, characterization, dialogue, and point of view in story and apply critical judgments to selected literature. • Create a literature unit demonstrating an understanding of the body of contemporary young adult literature and best practices for using literature with teenage readers.
Main Content	<p>Students will read, interpret and critically assess a wide array of literary texts. This will serve as a basis for a well-informed examination of the role of adolescent literature in the development of a wholesome world view and the development of a life-long reader. Following a socially-aligned conceptualization of young adult literature, the module equips students with response-centered approaches to literature that can help adolescents develop a repertoire of strategies and skills for personalizing their</p>

	<p>reading of literature. By applying relevant theoretical issues and insights students will be able to formulate a set of criteria/procedures for both selecting and using well-informed selections of literary texts with adolescents. This will encourage young adults to:</p> <ul style="list-style-type: none"> • Develop an appreciation of how language works in texts as they make meaning of what they read, • Bring their own experience to bear on what they read and write in response to their reading, develop cultural awareness through a reflection of cultural differences, • Promote an understanding of the role of the individual in society and the need for socio-cultural literacy.

Main Outcomes	<p>On completion of this module, students should be able to:</p> <ul style="list-style-type: none"> • Understand, contextualise and critically engage with service-learning within the contemporary theoretical and conceptual perspectives on community engagement (CE) in higher education (HE). • Demonstrate an understanding of the complexities of and key requirements for sustainable collaborative relations needed for engaging in experiential learning methodologies. • Develop an innovative curriculum for a service learning (SL) module or capacity building programme in which SL features as an experiential, transformative pedagogy. • Understanding the difference between modes of inquiry and the application of mode 2 inquiry (to develop useful knowledge) to advance their own teaching practice through systematic, participatory research into and through SL and CE.
Main Content	<p>The module comprises of the themes and subjects considered relevant towards developing best teaching practice in experiential learning pedagogies and in particular in service-learning. The four main themes covered are:</p> <ul style="list-style-type: none"> • Theoretical, conceptual and institutional policy perspectives on the development of SL in CE • Participants will be familiarised with the conceptual and theoretical frameworks of SL and CE and required to analyse the role of institutional policy and practice in realising SL and CE within the SA context. • Collaborative Practices in SL and CE • Reciprocity is central to engaging students in community-based curricular work. A clear grasp of the concept community and the process of initiating, establishing and maintaining collaborative relationships and linkages are paramount to this reciprocity. • Application of Service-Learning in curriculum design

	<ul style="list-style-type: none"> The theoretical and conceptual framework for SL forms the foundation of this theme. Phases of curriculum design; Reflection; Assessment; and evaluation are implemented within the context of risk management and quality assurance in experiential teaching and learning. Research in SL and CE Research in teaching is one of the pathways to scholarship of engagement which entails reflecting on and writing about one's own work. Participants will be introduced to research aligned with the development of mode 2 knowledge production through applicable research methodologies.

NQF Level	9

Duration	Semester
Proposed semester to be offered.	Second Semester
Programmes in which the module will be offered	Master of Education (ALGC) (4830)
Year level	9
Main Outcomes:	<p>On completion of this module, students should be able to:</p> <ul style="list-style-type: none"> • Understand the challenge of globalization and the various ways in which it manifests in peoples' lives and is exemplified locally. (It focuses on the different ways global change impinges on students through an exploration of their experience). • Orientate to intercontinental study through an introduction to the learning devices and technologies which they will use and through preparing their own profiles which will aid them in finding and interacting with students in other countries. • Understand the notion of a capability framework which will frame their study throughout the programme. They will negotiate their learning goals and outcomes for the programme with their local mentor/tutor, monitor their progress in achieving them throughout the programme and renegotiate them as appropriate. • Reflect on their experience throughout the programme and integrating their diverse experiences and achievements.

	<ul style="list-style-type: none"> • Develop study skills to cope with the demands of study in academic cultures and contexts with which they may not be familiar. (This will include discussion of academic standards).
Main Content:	<p>The course comprises three clusters of activities. One is completed at the start of the enrolment, the second During the programme, the final at the end:</p> <ul style="list-style-type: none"> • The first of these is the development of a personal learning profile in which students review the prior learning in which they have engaged which is in some way connected to the goals of the course and their aspiration for the learning. From this activity students will draw three products: <ul style="list-style-type: none"> • A profile which they will use to introduce themselves and their learning goals when interacting with staff and other students in other course • A self-assessment of themselves at the start with respect to the capability framework • A learning plan which will guide their choice of activities in the rest of the programme (while students will not have any choice of course in which they are enrolled, they will be able to influence the task in which they are engaged in those course) • The second is a continuing portfolio or record of learning and their reflections on their experience. Students will be encouraged to keep an on-going learning journal across courses. This will not be formally assessed, but will provide the raw material for the final assessed activity. Students will also be encouraged to form a self-chosen learning partnership, if possible, with a student in another country. Students would be expected to correspond by email and share their experiences of the course. This would supplement any short-term partnerships within a particular course • The third of these is development of a capstone statement demonstrating how the student has met the capabilities of the programme. One element of this will be prepared in the form of a brief descriptive summary of a profile of achievements that can be used to show to employers or educational institutions. This will be detailed evidence to support the summary and which will enable the summary to be endorsed. <p>Criteria for satisfactory performance in each of these will be developed and the first and third of these will be formally assessed and feedback given to students.</p>
